- 60 MM

goals

We provide goals in different sizes that are compatible with the size of the field and in accordance with international specifications, and with different materials

Basketball

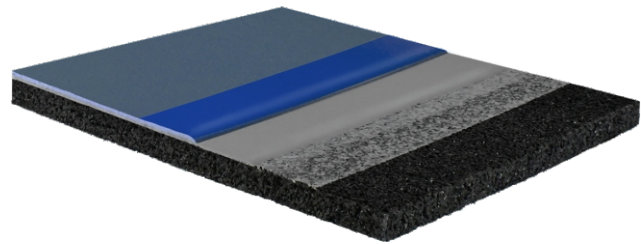

Basketball is a popular team sport known for its fast-paced action, skillful ball-handling, and exciting plays. The primary objective of basketball is to score points by shooting a ball through the opponent's hoop, which is an elevated, circular basket with a net. Each made basket is worth a specific number of points, with two points for a field goal and one point for a free throw.

Court Dimensions

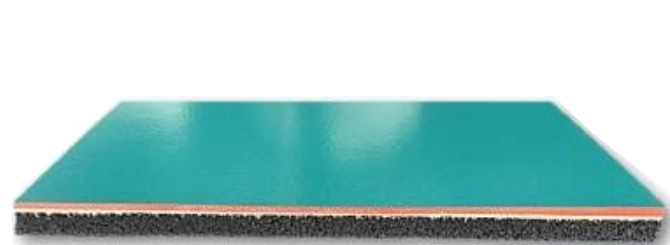

A standard basketball court is rectangular and measures 28 by 15 meters (94 by 50 feet).

Floor Applications Used in Basketball Court Construction:

Basketball Court With Acrylic Floor.

Basketball Court With Polyurethane Floor.

Basketball Court With PVC Floor.

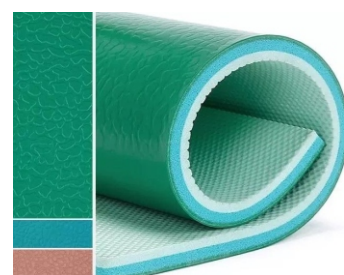

Table tennis

Table Tennis consists of a table, with a net divider and rackets. We provide equipment, including the tables.

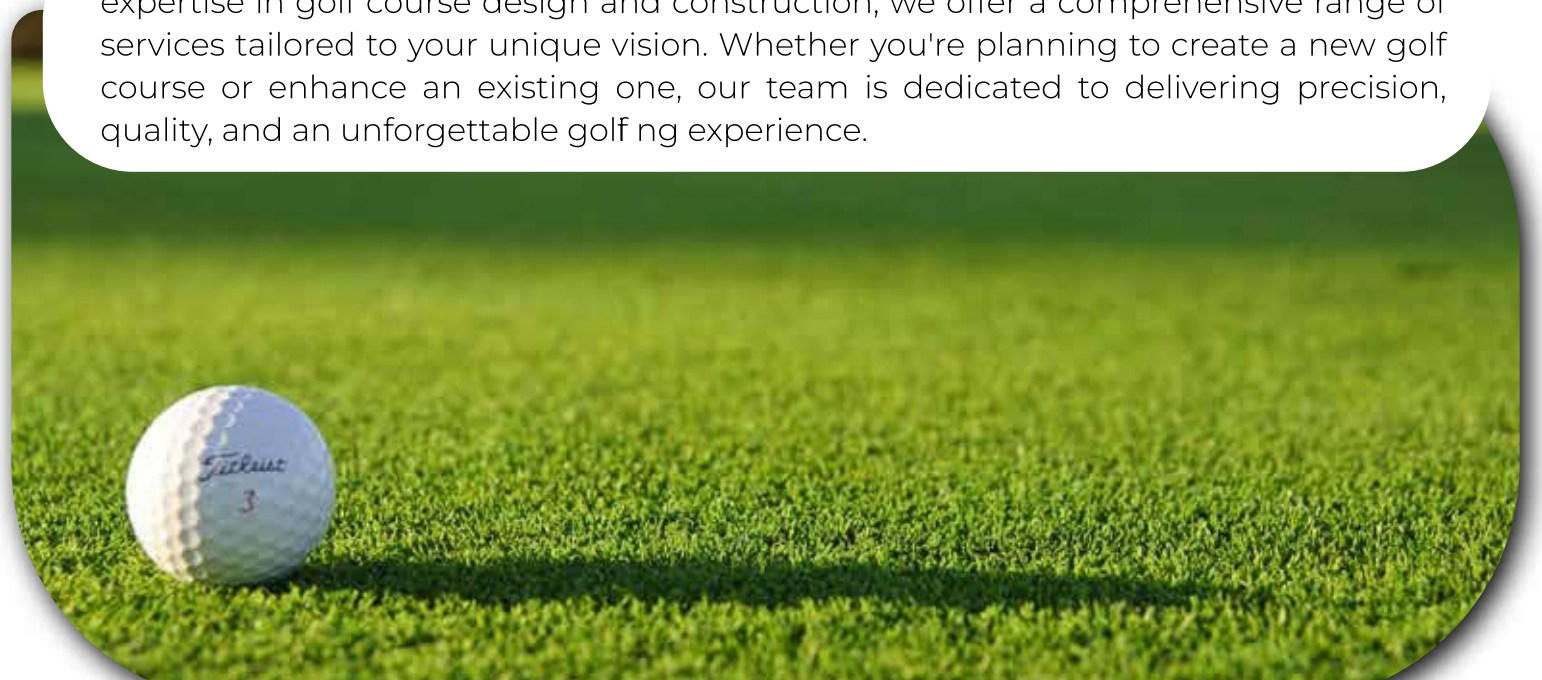

Cricket

Table Tennis consists of a table, with a net divider and rackets. We provide equipment, including the tables.

Golf

We are your trusted partner for bringing exceptional golf courses to life. With extensive expertise in golf course design and construction, we offer a comprehensive range of services tailored to your unique vision. Whether you're planning to create a new golf course or enhance an existing one, our team is dedicated to delivering precision, quality, and an unforgettable golfing experience.

Volleyball

Volleyball is a popular team sport known for its fast-paced action, dynamic gameplay, and emphasis on teamwork.

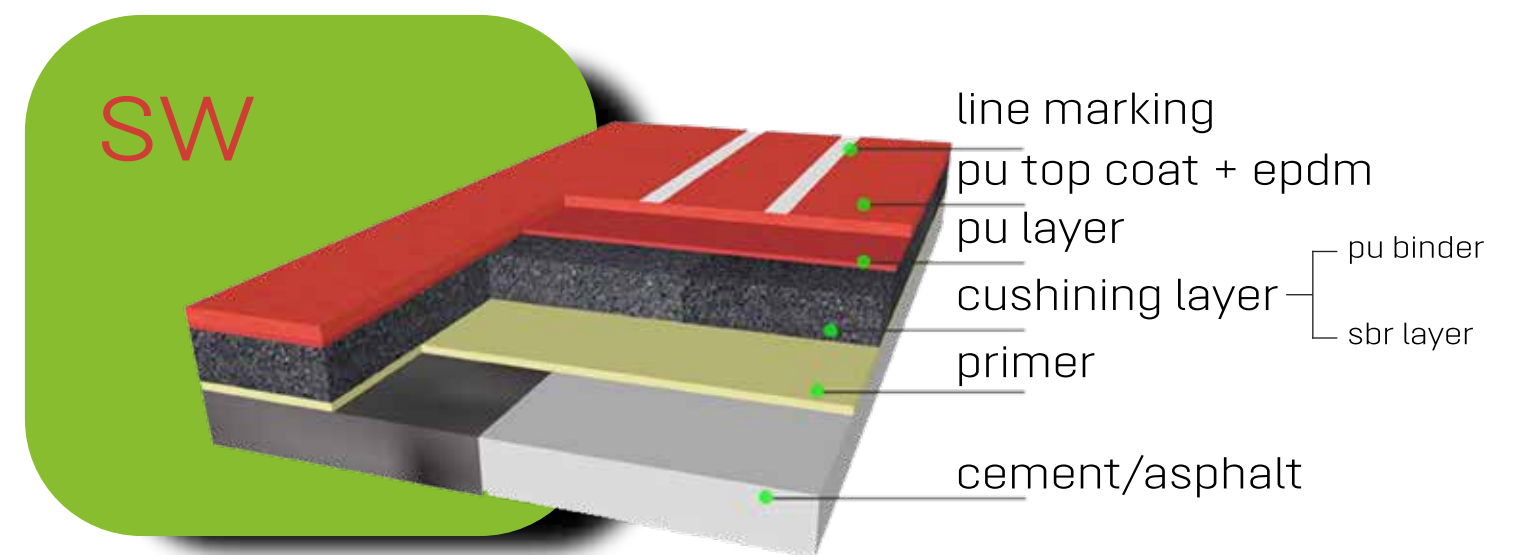

The primary objective of volleyball is to score points by successfully sending the ball over the net into the opponent's court and making it land in the opponent's playing area. Each successful play results in a point, and the first team to reach a specified number of points wins the set, with a match typically consisting of multiple sets.

We take pride in being your one-stop solution for all things related to volleyball courts. Whether you're looking to build a new volleyball court or upgrade your existing one, we offer a comprehensive range of services and equipment to meet your specific needs. Our expertise extends to providing high-quality volleyball courts, top-of-the-line floor surfaces, and all the essential requirements for an outstanding playing experience.

Epdm Running Track

A running track requires antislipping material designed to absorb impacts and prevent slipping. Running tracks are all about the flooring you use that determines its quality and comfort level. We can provide you with flooring that is resistant to the harsh weather of the United Arab Emirates

① Surface layer

Material: EPDM particle + polyurethane runway glue

② Elastic layer

Material: pure EPDM granule + environmental protective polyurethane sizing agent

③ Waterproof binder

Material: one-component polyurethane binder

④ Foundation

Cement and asphalt

1-Weather Resistance: EPDM exhibits outstanding weather and UV resistance, making it an ideal choice for outdoor applications. It can withstand prolonged exposure to sunlight, rain, and temperature fluctuations without degrading.

2-Durability: EPDM is highly durable, with a remarkable ability to resist wear and tear. It has a long service life, even in harsh conditions.

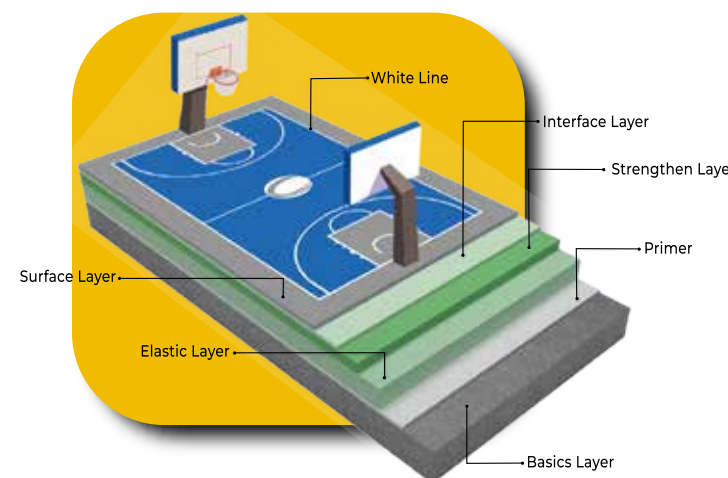

Sport Flooring

sport rubber flooring

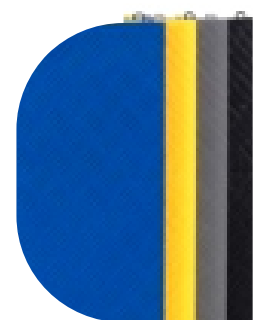

The **sports rubber flooring** is an environmentally friendly, water-based material, and contains no asbestos, lead or mercury compounds. It features an excellent UV resistance, wear resistance, and durable covering, as well as a long service life. The rubber flooring is available in a variety of colors, including blue, red, green, or customized. It is suitable for indoor and outdoor use on tennis courts, volleyball courts, basketball courts, badminton, widely used in schools, courtyards, kindergartens, parks, game floors and other places.

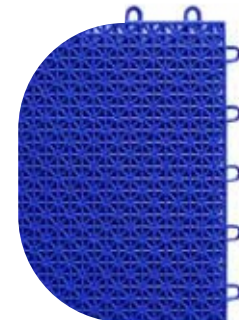

- ① **Surface layer:** strong wear resistance and durability, bright and beautiful color.
- ② **Elastic layer:** professional elasticity and comfortable cushioning performance.
- ③ **Waterproof bottom coat:** a permeated and strengthened surface will improve the adhesive force.
- ④ **Foundation layer:** cement or asphalt foundation.

PP tiles flooring

the size of the mat is 400*400*18mm
the edge size is 400*60mm and it is a slope.
the ring buckle is the female edge, and the other is the male edge. color available of edge is yellow and grey. the corners are used as accessories.

the tile size is 400*400*20mm, 520g/pc, the edge size is 400x70mm and it is a slope, the convex buckle is the female edge, and the plane side is male edge.

Vinyl Flooring

ceramic bead finish uv coating

wear layer

high definition decor film

solid polymer core board

ixpe padding

Vinyl flooring is a versatile and popular flooring material known for its durability, affordability, and wide range of design options. It's a synthetic flooring product that has gained popularity in both residential and commercial spaces.

1-Durability: Vinyl flooring is highly durable, capable of withstanding heavy foot traffic, making it suitable for both residential and commercial spaces. The wear layer protects the surface from scratches, stains, and wear and tear.

2-Variety of Styles: Vinyl flooring offers an extensive selection of designs, patterns, and colors. It can mimic the look of various materials, including wood, stone, ceramic tiles, and more, providing versatility in design.

3-Affordability: Vinyl flooring is often more budget-friendly than natural materials it mimics, making it an economical choice for those looking to achieve a specific aesthetic without breaking the bank.

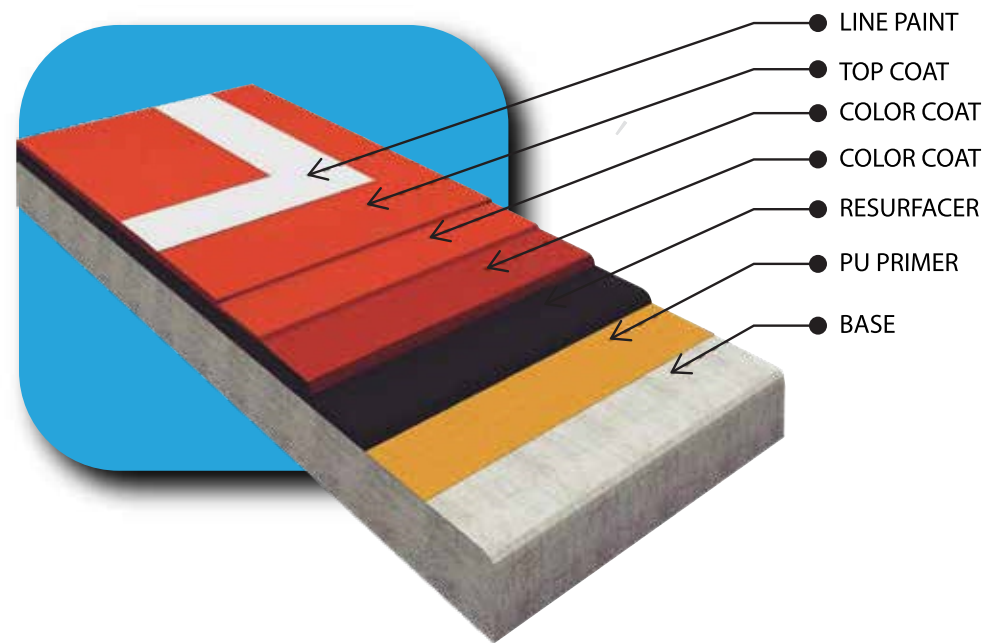

4-Water Resistance: Many vinyl flooring products are water-resistant, making them suitable for wet areas like kitchens, bathrooms, and basements.

5-Comfort and Warmth: Vinyl flooring is softer underfoot than hardwood or tile and can offer a bit of warmth and cushioning, making it more comfortable to walk on.

6-Easy Maintenance: Vinyl is relatively low-maintenance. Regular sweeping and occasional mopping are usually sufficient to keep it clean. Its smooth surface is resistant to stains.

Acrylic Flooring

Acrylic flooring is a type of flooring system that uses acrylic resins to create a durable, attractive, and functional surface. Acrylic floors are often used in commercial and industrial settings, but they can also be found in some residential applications.

Horse Stable Flooring

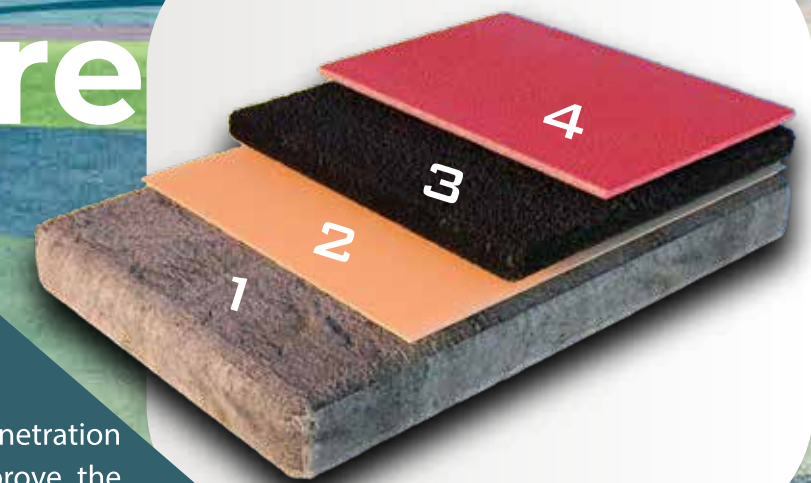

Acrylic flooring is a type of flooring system that uses acrylic resins to create a durable, attractive, and functional surface. Acrylic floors are often used in commercial and industrial settings, but they can also be found in some residential applications.

Kids play area Flooring

This product is made of EPDM particles with a high strength, high elasticity and strong ultraviolet resistance that have been mixed with a high strength single component environment-friendly MDI glue. This product can be paved and compacted directly on a base of concrete or asphalt. The bottom layer is composed of high-strength single-component polyurethane adhesive at room temperature, then mixed in a specific proportion with rubber particles. The flooring will then be laid using professional construction tools. This ensures the playground flooring is easy to install, with a strong foundation that will not easily peel or foam.

Basic Structure

- ① Foundation cement or asphalt
- ② Waterproof binder
 Material: one-component polyurethane binder
 Features: Excellent waterproof performance, penetration will strengthen the bottom surface and improve the adhesive performance.
- ③ SBR layer
 cryogenized rubber filler
- ④ Elastic layer
 Material: pure EPDM granule + environmental protective glue
 Features: environmentally friendly, odorless, oil free, easy to install

Sports Equipment

We provide all sports equipment to meet the needs of athletes, sports enthusiasts, and teams. Our comprehensive selection includes a wide range of gear, from balls, bats, and protective equipment for contact sports to footwear, apparel, and accessories designed for various athletic pursuits. Whether you're into team sports, individual sports, or recreational activities, we offer a diverse inventory of high-quality sports equipment.

Fitness center

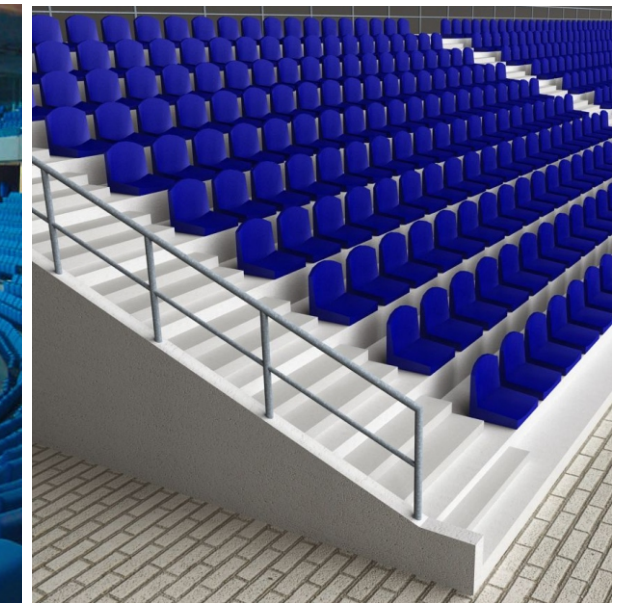

A gym is a facility equipped with various exercise and fitness equipment designed to help individuals improve their physical fitness, strength, and overall health.

Our passionate team is eager to collaborate with you and deliver gym flooring and equipment solutions that align with your vision, enhance your brand, and provide an exceptional fitness experience.

gymnasium Seating

We provide gymnasium seating solutions for gyms, large stadiums, auditoriums and lecture halls. We can design and customize the seats according to customer requirements, such as the color, size, type and structure of the seats, as well as the place where the seats will be used.

swimming pool

We offer a comprehensive range of services, catering to three distinct types of swimming pools: vinyl, fiberglass, and concrete.

1-Vinyl Pools: We excel in designing and building vinyl swimming pools, known for their versatility and cost-effectiveness. Our vinyl pools are available in various shapes and sizes, featuring durable vinyl liners that are customizable to match your style.

2-Fiberglass Pools: Our expertise extends to fiberglass pools, prized for their low maintenance and quick installation. We provide a range of fiberglass pool designs, each engineered for durability, strength, and easy maintenance.

3-Concrete Pools: If you're seeking the ultimate in customization, our concrete pools are a top choice. We design and construct concrete pools that offer limitless design possibilities, ensuring your pool reflects your vision and complements your outdoor space.

Artificial Grass

We provide long lasting, maintenance free and simple to manage grass to cover your balcony, terrace, garden or lawn, or even your sports facility. It is durable and can withstand any weather condition, including the high heat temperatures of the UAE. It has a water drainage built in that does not obstruct the flow of water, which means easy cleaning.

we offer a comprehensive selection of artificial grass varieties, including :

Tiger Turf

is a well-known brand that specializes in manufacturing synthetic turf products for various applications, including sports courts.

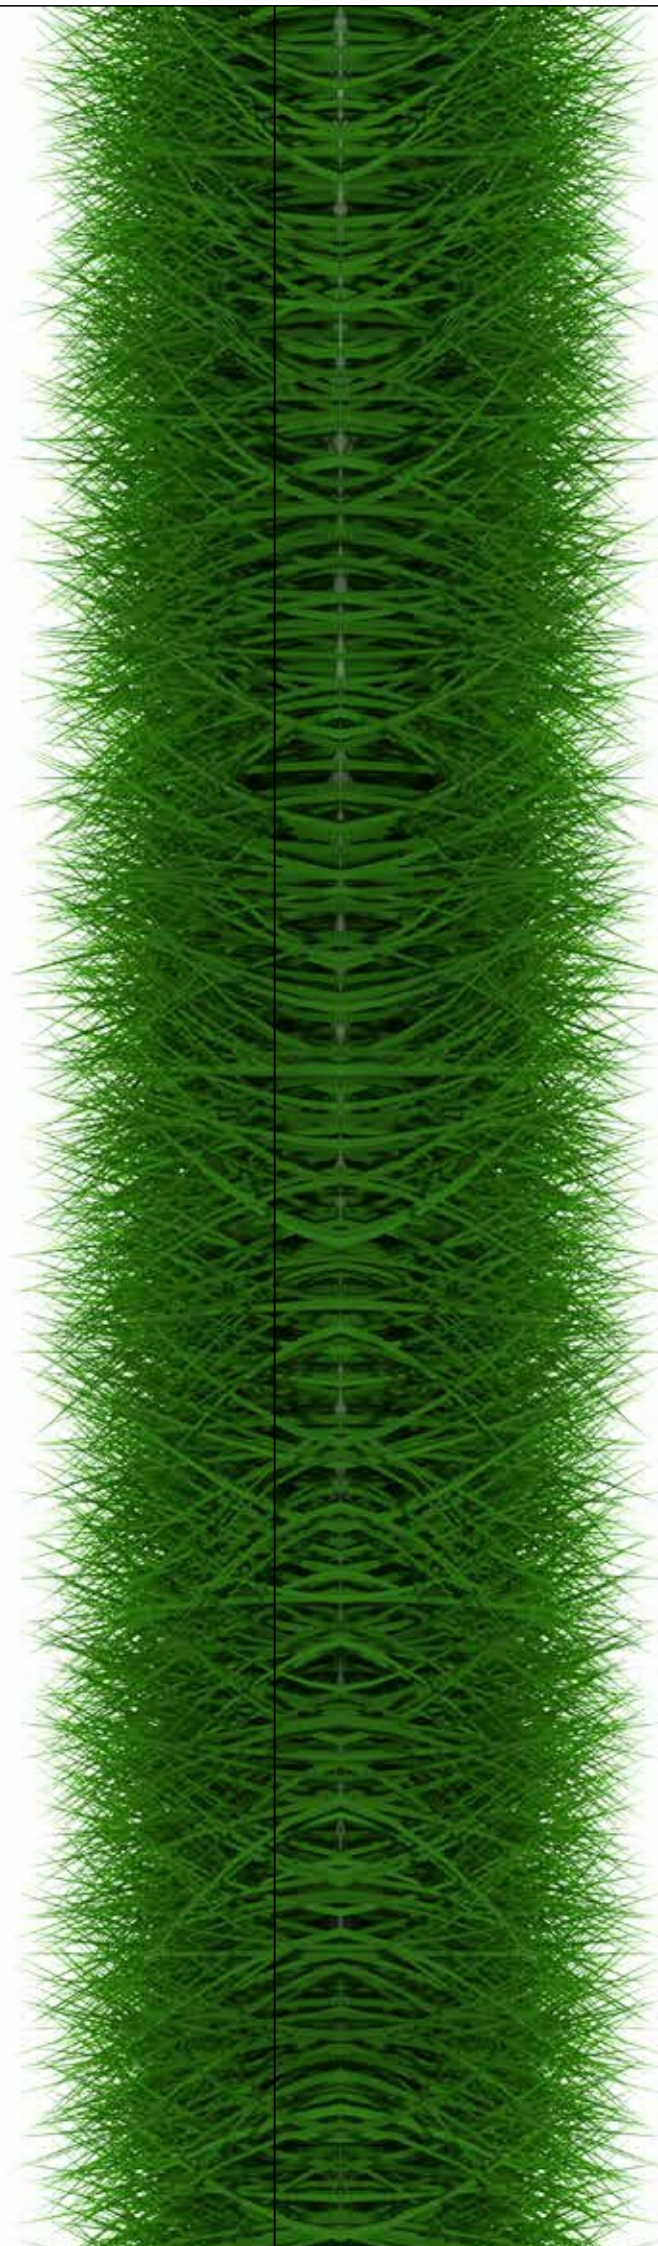

Vietnam Turf

The Vietnam Grass range is crafted to provide a natural and inviting appearance, ensuring that your landscape remains green and

Poland Turf

Poland Grass brings a touch of European elegance to your outdoor spaces. It is known for its premium quality and durability

China Turf

China is a significant producer of artificial grass or synthetic turf for various applications, including sports courts. When you're considering Chinese artificial grass for a court, it typically refers to using synthetic turf for sports courts, recreational courts, or other playing surfaces.

We can also customize your artificial grass to meet your specific needs and preferences. Whether you're looking for a lush, green lawn that mimics natural grass, or you want a more unique and creative design, we've got you covered. Our team of experts can tailor the color, length, and texture of the artificial grass to match your vision.

Foam

Foam is used as an underlay or padding beneath artificial grass in certain applications, particularly in areas where additional cushioning or shock absorption is desired. The foam underlay can provide a softer and more comfortable surface for activities like play areas, sports fields, or landscaping. It can also help with drainage and reduce the risk of injuries. The installation of foam underlay beneath artificial grass typically involves preparing the base, placing the foam layer, and then installing the artificial grass on top. Proper installation is essential to ensure that the artificial grass remains stable and drains effectively. Keep in mind that not all artificial grass

SHADING

Shades come in various forms to provide protection, privacy, or aesthetic appeal in different settings. These shading systems are essential for creating comfortable and weather-resistant environments in outdoor living areas, patios, and other open spaces, allowing people to enjoy the outdoors regardless of the weather conditions.

AWNINGS

Attached to the exterior of buildings over windows, doors

PERGOLAS

Open structures with cross-beams and a durable open lattice

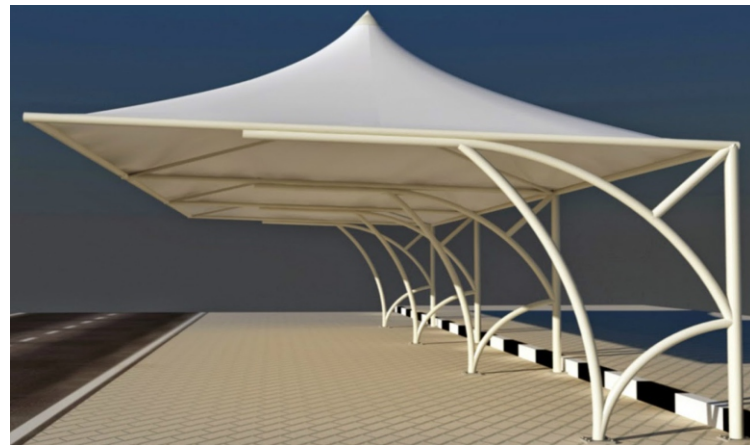

SHADE SAILS

Tensioned fabric structures in various shapes

CANOPIES
